Introduction of Aradur® HY 2919-1 replacement for Aradur® HY 2919

Dear Valued Customer,

Thank you for your interest in our product Hardener HY 2919.

We are pleased to announce that we have qualified a new, SVHC-candidate-free quality of this well-known hardener (HY 2919 contains a small amount of MHHPA, which is on the SVHC candidate list under REACH regulation – authorization for MHHPA might be needed from year 2022 onwards).

The hardener will be delivered under the following designation:

HY 2919-1 BD 25kg item 4120308

specifications, performance and quality remain unchanged.

To ensure continuous and future compatibility of our product portfolio with REACH regulation, we intend to fully replace HY 2919 with the new HY 2919-1 by the end of Q3 2018.

As the change in composition is very small, HY 2919 can simply be substituted by HY 2919-1 without need for any adaptations in processing or final properties after cure.

For any other information regarding this product, please do not hesitate to contact your sales representative or technical support.

We wish you a lot of success and thank you again for business with Huntsman.

Sincerely yours,

Dr. Hubert Wilbers
