DAHLTRAM® C-250GF

Medium temperature additive manufacturing

DESCRIPTION

Dahltram® C-250GF is a cost effective, low to medium temperature use, additive manufacturing polymer with a maximum recommended use temperature of 135°C. It is a modified Poly Carbonate (PC) based material and is reinforced with glass fibre for maximum strength and long-term performance. Dahltram® C-250GF is ideal for room temperature tooling solutions, stretch forming and low temperature master moulds. Additionally, it is vacuum tight and autoclave capable in all forms and can be machined to the tolerances and surface finish required.

BENEFITS

- Additive manufactured tools can go from conception to the production floor in days not weeks.
- Dahltram® C-250GF is a cost effective solution ideal for 121°C cure systems and much more.
- Provides higher strength, higher temperature performance and higher throughput.
- Glass reinforcement offers lower cost and higher impact strength.

NOTES

- The maximum use temperature is dependent upon the duration at maximum temperature, and is process specific, Airtech recommends testing prior to use.
- Shelf life unlimited when stored in original packaging at 22°C.
